SVSGROUP

SVS, DEFENCE COMPANY OF THE YEAR 2014

ISTANBUL, TURKEY, 6 MARCH 2015

SVS was announced as winner of the annual Golden Cube Award from Teknopark Istanbul, an internationally recognized center for science and technology in Turkey. SVS won in the category of the Defence Company of the year 2014 from a list of 120 contestants with offices in the Teknopark Istanbul campus.

Abdullah Saglam,

General Manager of SVS, said:

“Winning the Defence Company of the Year 2014 Award in such an important organization, forces us to achieve more for next years and I’m sure our team is going to effort their best to replicate this achievement again. SVS will always be a part of Defence Industry with more qualitative roles.”

Teknopark Istanbul is a science and technology center which is being developed by the Undersecretariat for Defence Industries and the Istanbul Chamber of Commerce to contribute to Turkey’s technology development capacity for local and international entrepreneurs.

Upon this decision on the 20th of April 1988, the Council of Ministers allocated 13 million m2 of land to ITEP (Advanced Technology Support Programme) for national use. 2,5 million m2 of this grant has been allocated for the use of Teknopark Istanbul.

The establishment process of Teknopark Istanbul project, one of ITEP’s most critical projects, began with the signing of the Letter of Intent on the 12th of February 2009 by the three initial members of the Founding Committee; the Undersecretariat for Defence Industries, the Istanbul Chamber of Commerce and Istanbul Commerce University. Airport Management and Aeronautical Industries Inc. and Defence Technologies Engineerings and Trade Inc. joined these signatories to become founding members.

We feel honored to be nominated as “Defence Company of the Year” and “The Exporter of the Year” in this year’s Golden Cube Award. Teknopark Istanbul has an important role in Turkish Defence Industry because of the relation with Undersecretariat of Turkish Defence Industries(SSM). That is why we are proud of being winner of “Defence Company of the Year” award indeed.

To be honest, the main point that provides us to win such an important award is not our current business volume in Defence Industry.

The award is directly regarding with our potential and capabilities to become a global brand of Turkish Defense Industry as well SVS Satellite Systems has been in global Satellite Communication Industry for twenty years.

So we have to give our best to remunerate this award by reaching a remarkable business volume in 2015. Therefore we are working harder than ever to play a key role in TUMSIS and KASUMSIS projects as a sub-contractor of Aselsan. Except these new potential agreements, ongoing projects that we have as LST, JEMUS, UBOPAV, SOTM lead our way to have great expectations from 2015 business year.

Also there will be new agreements for international markets in Azerbaijan, Saudi Arabia, France and Malaysia. We expect that this year is going to be an important milestone of SVS business history and “Defence Company of the Year” award is only starting point of such a successful business year.
