

SVS ATTENDED 2ND LAND SYSTEM SEMINAR

"Hence SVS has been working in Defense Industry as a solution provider of worldwide contractors, 2nd Land Systems Seminar keeps importance for our corporation because of being first exhibition of us as a sponsor to such an organization.

As a result of re-engineering process of our organization, we established a new branch in Teknopark İstanbul, founded by Undersecretariat for Turkish Defense Industries(SSM), and we became a subcontractor of worldwide contractors in long-term supply and/or development projects. We are sure that, SVS Defense & Technology Branch will become a global brand of Turkish Defense Industry as well SVS Satellite Systems has been in global Satellite Communication Industry for twenty years."

Ulvi GÜVENÇ
MSEE, MBA

Head of Defense and
Technology Division of SVS

This year 2nd Land system seminar took place in november 2014 at METU CCC in Ankara . Hundreds of defence professionals to witness presentations on multiple perspectives of land defence topics included operational , technical and international . As evidence , this seminar had reached over 900 participants at Naval system seminar last year . As usual , qualified antenna manufacturer company named as SVS , attended to this seminar as session sponpor . This seminar was very efficient for SVS family to share new products and solutions which will be entered in defense industry . In addition to that , SVS family thanks everyone who organized this seminar and we also feel excited in advance for 3rd land system seminar as well . We believe that SVS will contribute best way to this seminar again.

ABOUT SVS SATELLITE SYSTEMS

SVS Satellite Systems (SVS Telekomünikasyon Hizmetleri San. ve Tic. A.Ş.) was established in 1995 by an experienced team of satellite communications professionals. We now serve broadcasters, telecom companies, satellite operators, satcom system integrators and defense companies with mobile and fixed antennas, equipment, integrated solutions, and services.

SVS Satellite Systems offers complete turnkey solutions, engineering designs, maintenance and consultation on all types of communications systems. We carry data, voice, video over satellite. Our team of professionals has used its expertise to design and construct fixed and mobile earth stations worldwide. SVS Telekom engineers oversee every aspect of production and have the unique ability to fully integrate a satellite system before it is shipped to the customer's site. With well equipped lab facilities and more than 90 experienced people - most of them technical - our products, services and solutions are empowering the satcom market.
